Dr. Joshua Lederberg
Professor of Genetics
Stanford University
School of Medicine
Palo Alto, California

Dear Dr. Lederberg:

I am enclosing a draft of a proposed report of our Committee which will ultimately be for Dr. Berkner's consideration. This is obviously a preliminary report. I have attempted to synthesize your ideas, those expressed by others on the Committee and my own. Please modify the report as you think best. If there are points of disagreement between the various members of the Committee, I will recirculate the material. A few points were mentioned only by some one of the various members of the Committee--these I have sometimes disregarded.

I feel that all of us owe much to Dr. Montgomery for his effective transmission of ideas and information.

I would appreciate having your comments soon.

I expect to see Dr. Berkner for an informal preliminary discussion in New York this Tuesday.

Sincerely yours,

Shields Warren (24)
